

DataGuardian is the world's first Mobile Detection Platform (MDP) purpose-built to continuously detect suspected smartphone compromise in real time. Using advanced AI analytics and behavioral intelligence, DataGuardian identifies both known and previously unknown attack techniques – including Zero-Day and Zero-Click exploits – and delivers near real-time alerts so you can **stop data theft before it happens.**

REAL-TIME SMARTPHONE BREACH DETECTION

Detect. Alert. Protect.

REAL-TIME
Threat Detection & Alerting

1 ENTERPRISE SAAS ARCHITECTURE

2 DATAGUARDIAN MOBILE APPLICATION

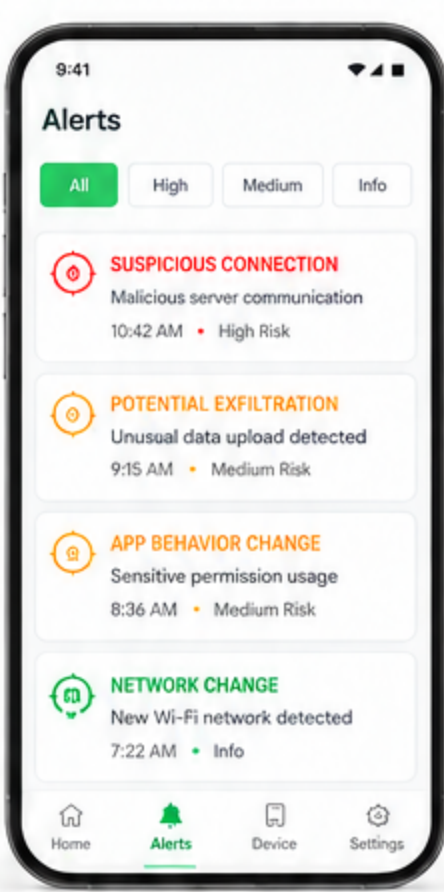

SECURITY STATUS
Protected
No active threats detected

THREAT SCORE
18 / 100
Minimal Risk
Updated: Just now

ACTIVE PROTECTIONS
All systems active

- Device Monitoring: Active
- Network Analysis: Active
- App Behavior Monitor: Active
- OS Integrity Check: Active

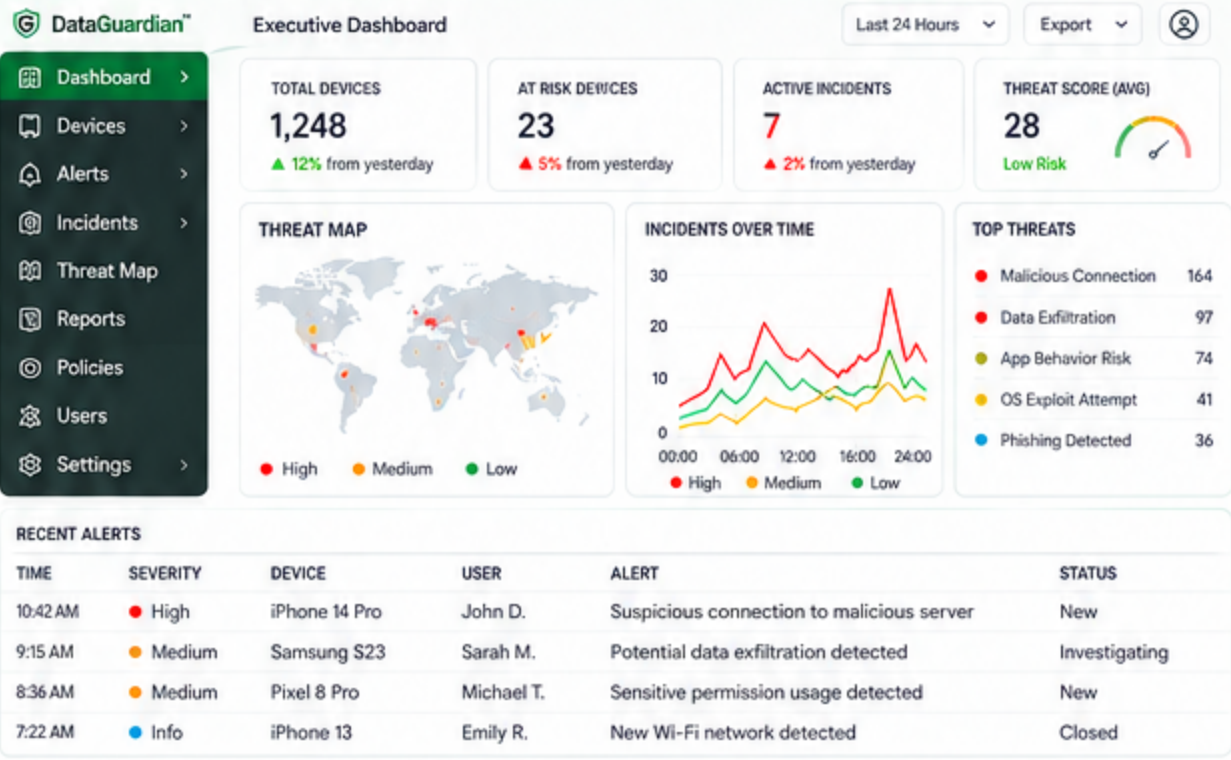

Alerts

- SUSPICIOUS CONNECTION**
Malicious server communication
10:42 AM • High Risk
- POTENTIAL EXFILTRATION**
Unusual data upload detected
9:15 AM • Medium Risk
- APP BEHAVIOR CHANGE**
Sensitive permission usage
8:36 AM • Medium Risk
- NETWORK CHANGE**
New Wi-Fi network detected
7:22 AM • Info

- Real-Time Threat Alerts
- Threat Score & Risk Level
- Device & App Monitoring
- Network & Wi-Fi Analysis

- Data Loss Prevention
- OS Integrity Monitoring
- Actionable Guidance
- Privacy By Design

3 MOBILE SECURITY OPERATIONS CENTER (M-SOC) – panel.dataguardian.com

PLATFORM CAPABILITIES

- AI-DRIVEN DETECTION**
Advanced machine learning and behavioral analytics identify suspicious activity and emerging threats.
- ZERO-DAY & ZERO-CLICK PROTECTION**
Detects advanced attacks, Zero-Day exploits and Zero-Click techniques traditional AV misses.
- REAL-TIME ALERTS**
Near real-time notifications deliver actionable intelligence so you can respond faster.
- CENTRALIZED VISIBILITY**
M-SOC gives security teams complete visibility across the entire mobile fleet.
- ACTIONABLE INTELLIGENCE**
Correlated threat context and recommended actions empower better, faster decisions.
- ENTERPRISE SAAS PLATFORM**
Secure, scalable, cloud-native architecture with 99.9% uptime, role-based access and API integration.

HOW IT WORKS

BUILT FOR EVERY ENVIRONMENT

Enterprise Security Teams

Government & Public Sector

Critical Infrastructure

Healthcare

Financial Services

Executive & High Net Worth

Small & Medium Business

Individual Professionals
